

Perhaps changing of the Do Not Call Law in New Jersey might benefit some of those people who make their living by annoying others during their dinner hour, or while the baby is sleeping or in the bathtub, or by coercing some poor elderly person to purchase something they cannot afford (i.e. my 89 year old mother's new, improved, and very expensive hearing aides that are sitting in the drawer because they don't work), but it certainly won't benefit those of us who no longer have their privacy invaded by these annoying and unrelenting phone calls. Please do not change the New Jersey consumer protection laws in any way. Thank you for the opportunity to be heard.
